Overseen by Project Manager: Stephen
Of: websitedesign.co.za

Certificate added to domain on the: 26.07.2016
URL of Certificate: www.planesafety.co.za/SEO_certificate.pdf & www.dangerousgoodstraining.co.za/SEO_certificate.pdf
Domain: www.planesafety.co.za & www.dangerousgoodstraining.co.za

Notes:

Search Engine Optimization (otherwise referred to as S.E.O.) is when certain principles, tasks and actions are taken to influence search engines to understand and better rate a website and its pages for position/s on their search results.

SEO is one of three types of three main web marketing tools: PPC, SEO and Affiliate/Socail.

SEO can broadly be divided into two sections:

Steps and tasks that can only be done once

Steps and tasks that can be repeated.

R.P.D. (Research, Plan and Development) is our own acronym we give to broad variety of tasks / tools and software we use related to the processes we follow to analyze and research your website and its pages, its products and services, its content, structure and general quality in context of the current market as well as against primary competitors (websites and pages with better positions on search engines for primary search phrase). Based on data and research we then plan which SEO tools and tasks to use to actively target and actively achieve better positions This is a step missed by nearly all SEO and web design companies and is the reason SEO results can be slower than they need to be and more costly in the long run.

RPD can be implemented at different levels depending on the competitiveness of the market. It can also be repeated in part from time to time. We recommend at least every 2 years, or whenever a search engines make major changes to their algorithms.

No traditional or physical SEO is done during the RPD phase.

Setup. This is the phase of steps and tasks that can broadly only be done once. This is the first phase SEO work is physically done. Not all set up steps and tasks need to be done on all websites and pages, and in fact can have a negative effect if done incorrectly. Setup steps and tasks are the foundation of good SEO. RPD is where the selection of Setup tasks and tools for this phase are decided.

RCR&M = Repeated checks, Reviews, Tasks and Maintenance. This phase of SEO are tasks can be repeated indefinitely, and where the majority of work is done. It is also the main reason why no company should claim to be able to sell a client once off SEO. While a complete RPD is recommended once a year, the **RCR&M** phase essentially uses the ground work completed during the Setup phase and builds on from it. This phase should be done no less than once a month for the simple reason that search engines review (in general) a site or parts of a site at least once a month, therefore your rankings and positions on search engines are reevaluated against any new competitor or current competitor website who has made changes since your websites last review. The more competitive the market, the more frequent RCR&M should be done.

Phase	Task / Description / Detail	Notes History	Completed Date
R.P. D. - with Client	General consult and client brief. Summary of desired results and expectation on dates to achieve and a background overview on products / services / industry competitiveness / website status look and feel, function and SEO status. This is done via phone or meeting.		
R.P.D.	Assessment of own site		
	Areas of products or services		
	Primary products and services		
	How many competitors feature for primary products and services 1st page of google natural (actual mention of product and service in		
	Page count		
	Image count		
	Word content count		
	Content vs media ratio		
	Functionality and navigation status		
	Server reputation downtime		
	Server speed test		
	Domain quality		
	Status on file names, description & meta		
	Social media status		
	Current monthly unique visitors (if available from server) – or 3rd party estimated traffic checker		
	Current bounce rate (if available)		
	Current time on site (if available)		
	Amount of page views (if available)		
	Check site is responsive - https://www.google.com/webmasters/tools/mobile-friendly/		
	Other notes:		
	This step can take up to 4 days to ensure data is generated and all steps executed		
R.P.D.	Advance keyword assessment and implementations using Google Keyword Planner and Google Trend.	"Primary Keyword" reports and suggestions:	
R.P.D.	Assessment of own primary competitor site		
	Areas of products or services:		
	Primary products and services:		
	Page count:		
	Image count:		
	Word content count:		
	Content vs media ratio		
	Functionality and navigation status:		
	Server reputation downtime:		
	Server speed test		
	Domain quality:		
	Status on file names, description & meta:		
	Social media status:		
	Current monthly unique visitors (if available from server) – or 3rd party estimated traffic checker:		
	Check site is responsive - https://www.google.com/webmasters/tools/mobile-friendly/		
R.P.D.	Attempt to work out frequency of competitor updates on site, this will help us plan frequency of own SEO during RCR&M		
R.P.D.	Other notes:		
R.P.D.	This step can take up to 2 days to ensure data is generated and all steps executed		
R.P.D.	Run a 3 party SEO error check for page titles, descriptions, meta and content		
R.P.D.	Run a 3 party content originality check		
R.P.D.	Check number of incoming and outgoing links and their quality		
R.P.D.	Check on design & function – ensuring a client can engage or access information		
R.P.D.	Check images and media have correct titles, dictions, file names and details		
R.P.D.	Check on sites GEO locations on primary search engines		
R.P.D.	Check site accessibility: 404 errors, password-protected areas and other similar reasons.		
R.P.D.	Compare competitor vs Client own site status in context of all data and research. Send report back on Setup tasks to implement to create better foundation that competitor site in Setup and RCR&M phases. Submit report and certificate to client for review and proceed with secondary consult or SEO tasks if requested from Client.		
R.P.D.	Update SEO certificate		

Phase	Task / Description / Detail	Notes History	Completed Date	Developer	Project Manager Sign off Date	Project Manager name

[illegible]

[illegible]

Primary Keyword = a search phrase of two or more words that include the main product or service and often the location of operation. A Primary Keyword can also reference the main objective of a page on a website. For example: "car hire cape town"

We generally load the more important word first, for example, to a company that does car hire, the wording car hire is more important than the words cape town. This is not always obvious, but in some cases and services, search engines determine your location already and filter the search results.

Primary Keyword Extension = is an add on to a Primary Keyword. For example: "Car hire in Cape Town" the extension here is "in" and this in fact creates an entire new search phrase and results on search engines can change because of this.

Each web page (not website) should have no more than 1 Primary Keyword, and then its extensions.
For example:

Primary Keyword = "car hire cape town"

Extensions = "car hire in cape town" "cheap car hire cape town" "car hire cape town reviews" "car hire cape town prices" "car hire cape town pictures"

Engine & GEO = the search engine, and if the engine can offer location of site / services as state

Engine & GEO	Page/URL			Primary Keyword	Extension 1	Extension 2
Google SA	index			car hire	cape town car hire	cape town airport car hire
Cape Town	Date check Previous date check	1stJan2015 1st Dec2014	Position: Previous Position:	1st Page 1st Position 1st Page 2nd Position	1st Page 3rd Position 1st Page 4th Position	1st Page 8th Position 2nd Page 1st Position
